BARCODE SCANNER TYPES

HANDHELD COMPUTER
ALL-IN-ONE SCANNER
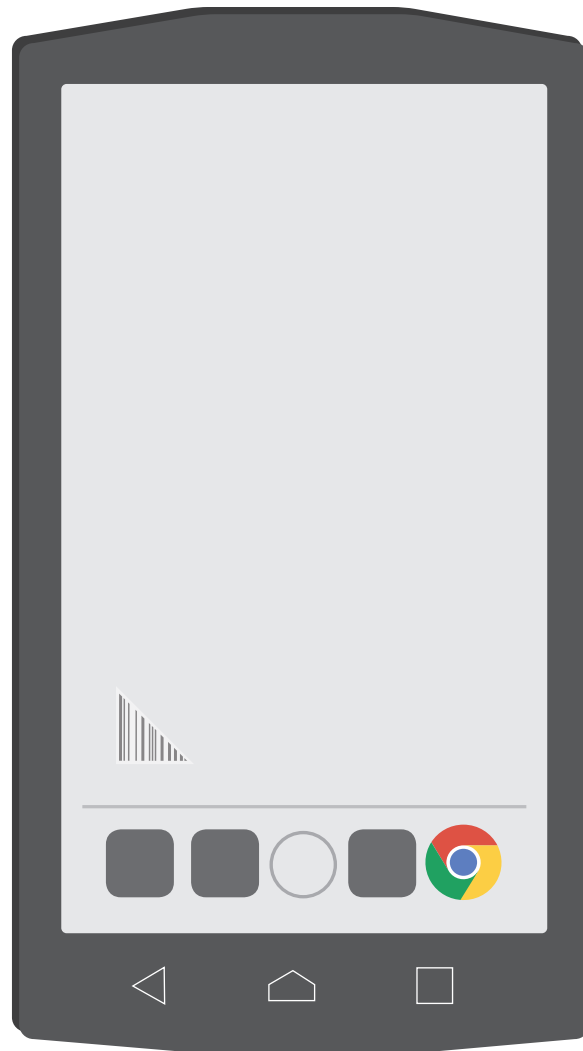

Scanner can access SPS via wifi or data provider just as you would on a smart phone.

Use Mobile Chrome browser to access SPS Core and Mobile Module. Chrome is browser of choice for SPS.

Rugged or impact resistant cases or similar rugged models are available

Configuration: Device is configured through Datawedge App for operation with SPS

Requirement: Configure scanner to append an enter/return keystroke after each scan. This ensures automatic submission or allowing scans to fill in one per line in a text area.

Zebra TC20
Not to Scale

RECOMMENDATIONS
• Zebra TC20 (Wifi Only)
• Zebra TC25

COMPANION SCANNER
BLUETOOTH OR BATCH MODE

This scanner requires a connection to a computer, tablet, or smart phone.

Bluetooth Mode: Scanner acts as a wireless keyboard when connected to a phone or tablet allowing the scans to load into the text fields in SPS.

Batch Mode: Scanner will store all the scans to itself in a file. The file and Scans are retrieved by plugging the scanner into a computer via USB.

Configuration: Any configuration is applied through various setup barcodes

Requirement: Scanner settings need to allow the scan/data transmission rate to be slowed for proper use with a mobile bowser and SPS Mobile Module.

Zebra CS4070
Not to Scale
